---

I am issuing a complaint charging the City of Flint, Genesee County, and the State of Michigan of violating my Civil Rights and Human Rights to Safe Water which is my right as a human being!!

You will find the attached warning letter issued to all city residents instructing us not to drink the water if we are vulnerable individuals. I am a paraplegic and my daughter is a special needs child so our health has been compromised since the City of Flint and Genesee County cut city residents off from Lake Huron Water on April 24, 2014. Genesee County residents still receive water from Lake Huron Water, uninterrupted. City of Flint residents are singled out (segregated) to only receive Flint River Water.

I only received this one and only warning letter since April 24, 2014. The second attached document is the DEQ letter to the City of Flint with instructions on notifying City of Flint residents of DEQ standard violations which continued each quarter since the start of Flint River Water service which also contain industrial pollutants as we all know.

Please accept my complaint as I rely on 3rd party individuals to provide safe clean water to my family.

Sincerely,
